## 2 Before applying power

XD-SERIES (EN/M,T)

**⚠ Caution : Read this page carefully to ensure safe operation.**

**Units are designed for operation as follows.**

**U.S.A. and Canada .....** **AC 120 V only**  
**Australia .....** **AC 240 V only**

**Europe and U.K. ....** **AC 230 V only**  
**China and Russia .....** **AC 220 V only**  
**\*Other countries .....** **AC 110-120 / 220-240 V switchable**

**For the United Kingdom**

### Factory fitted moulded mains plug

1. The mains plug contains a fuse. For replacement, use only a 13-Amp ASTA-approved (BS1362) fuse.
2. The fuse cover must be refitted when replacing the fuse in the moulded plug.
3. Do not cut off the mains plug from this equipment. If the plug fitted is not suitable for the power points in your home or the cable is too short to reach a power point, then obtain an appropriate safety approved extension lead or adapter, or consult your dealer.  
If nonetheless the mains plug is cut off, remove the fuse and dispose of the plug immediately, to avoid a possible shock hazard by inadvertent connection to the mains supply.

**IMPORTANT:** The wires in the mains lead are coloured in accordance with the following code:

Blue : Neutral

Brown : Live

Do not connect those leads to the earth terminal of a three-pin plug.

### \*AC voltage selection

The AC voltage selector switch on the rear panel is set to the voltage that prevails in the area to which the unit is shipped. Before connecting the power cord to your AC outlet, make sure that the setting position of this switch matches your line voltage. If not, it must be set to your voltage in accordance with the following direction.

### AC voltage selector switch

Move switch lever to match your line voltage with a small screwdriver or other pointed tool.

### Note:

Our warranty does not cover damage caused by excessive line voltage due to improper setting of the AC voltage selector switch.

## Safety precautions

**WARNING : TO PREVENT FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.**

**CAUTION**  
RISK OF ELECTRIC SHOCK  
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

THE LIGHTNING FLASH WITH ARROWHEAD SYMBOL, WITHIN AN EQUILATERAL TRIANGLE, IS INTENDED TO ALERT THE USER TO THE PRESENCE OF UNINSULATED "DANGEROUS VOLTAGE" WITHIN THE PRODUCT'S ENCLOSURE THAT MAY BE OF SUFFICIENT MAGNITUDE TO CONSTITUTE A RISK OF ELECTRIC SHOCK TO PERSONS.

THE EXCLAMATION POINT WITHIN AN EQUILATERAL TRIANGLE IS INTENDED TO ALERT THE USER TO THE PRESENCE OF IMPORTANT OPERATING AND MAINTENANCE (SERVICING) INSTRUCTIONS IN THE LITERATURE ACCOMPANYING THE APPLIANCE.

### The marking of products using lasers (Except for some areas)

**CLASS 1  
LASER PRODUCT**

The marking is located on the rear panel and says that the component uses laser beams that have been classified as Class 1. It means that the unit is utilizing laser beams that are of a weaker class. There is no danger of hazardous radiation outside the unit.

# Contents

**Caution : Read the pages marked  carefully to ensure safe operation.**

# 4 | **IMPORTANT SAFEGUARDS**

XD-SERIES (EN/M,T)

## **⚠ Caution :Read this page carefully to ensure safe operation.**

Please read all of the safety and operating instructions before operating this appliance. Adhere to all warnings on the appliance and in the instruction manual. Follow all the safety and operating instructions. These safety and operating instructions should be retained for future reference.

- 1. Power sources** – The appliance should be connected to a power supply only of the type described in the instruction manual or as marked on the appliance. If you are not sure of the type of power supply to your home, consult your appliance dealer or local power company. For appliances intended to operate from battery power, or other sources, refer to the instruction manual.
- 2. Power-cord protection** – Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, pay particular attention to cords at plugs, convenience receptacles, and the point where they exit from the appliance.

Never pull or stretch the cord.

- 3. CAUTION – Polarization** – This appliance may be equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug should still fail to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

- 4. Ventilation** – Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the appliance and to protect it from overheating, and these openings must not be blocked or covered. The appliance should be situated so that its location or position does not interfere with its proper ventilation.

To maintain good ventilation, do not put records or a table-cloth on the appliance. Place the appliance at least 10 cm away from the walls.

Do not use the appliance on a bed, sofa, rug or similar surface that may block the ventilation openings. This appliance should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer's instructions have been adhered to.

- 5. Water and moisture** – The appliance should not be used near water - for example, near a bathtub, washbowl, kitchen sink, laundry tub, in a wet basement, or near a swimming pool, etc.

- 6. Temperature** – The appliance may not function properly if used at extremely low, or freezing temperatures. The ideal ambient temperature is above +5°C (41°F).
- 7. Heat** – The appliance should be situated away from heat sources such as radiators, heat registers, stoves, or other appliances (including amplifiers) that produce heat.
- 8. Electric shock** – Care should be taken so that objects do not fall and liquid is not spilled into the enclosure through openings. If a metal objects, such as a hair pin or a needle, comes into contact with the inside of this appliance, a dangerous electric shock may result. For families with children, never permit children to put anything, especially metal, inside this appliance.

- 9. Enclosure removal** – Never remove the enclosure. If the internal parts are touched accidentally, a serious electric shock might occur.

- 10. Magnetic fields** – Keep the appliance away from sources of magnetic fields such as TV sets, speaker systems, radios, motorized toys or magnetized objects.

- 11. Cleaning** – Unplug this appliance from the wall outlet before cleaning. Do not use volatile solvents such as alcohol, paint thinner, gasoline, or benzine, etc. to clean the cabinet. Use a clean dry cloth.

- 12. Accessories** – Do not place this appliance on an unstable cart, stand, tripod, bracket, or table. The appliance may fall, causing serious injury to a child or adult, and serious damage to the appliance. Use only with a cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the appliance. Any mounting of the appliance should follow the manufacturer's instructions, and should use a mounting accessory recommended by the manufacturer. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn.

**13. Lightning** – For added protection for this appliance during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the appliance due to lightning and power-line surges.

**14. Abnormal smell** – If an abnormal smell or smoke is detected, immediately turn the power OFF and unplug the appliance from the wall outlet. Contact your dealer or nearest service center.

### POWER OFF!

**15. Damage requiring service** – The appliance should be serviced by qualified service personnel when:

- A.** The power-supply cord or the plug has been damaged.
- B.** Objects have fallen, or liquid has been spilled into the appliance.
- C.** The appliance has been exposed to rain or water.
- D.** The appliance does not appear to operate normally by following the instruction manual. Adjust only those controls that are covered by the instruction manual as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the appliance to its normal operation.
- E.** The appliance has been dropped, or the enclosure damaged.
- F.** The appliance exhibits a marked change in performance.

**16. Servicing** – The user should not attempt to service the appliance beyond that described in the instruction manual. All other servicing should be referred to qualified service personnel.

**17. Outdoor antenna grounding** – If an outside antenna is connected to the appliance, be sure the antenna system is grounded so as to provide some protection against voltage surges and built up static charges. Article 810 of the National Electrical Code – ANSI/NFPA 70, provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Figure.

#### EXAMPLE OF ANTENNA GROUNDING AS PER NATIONAL ELECTRICAL CODE

**18. Power lines** – An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits as contact with them might be fatal.

**19. AC outlets** – Do not connect other audio equipment with a power consumption larger than that specified to the AC outlet on the rear panel. Never connect other electrical appliances, such as an iron or toaster, to it to prevent fire or electric shock.

**20. Overloading** – Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.

**21. Attachment** – Do not use attachments not recommended by the appliance manufacturer as they may cause hazards.

**22. Replacement parts** – When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original parts. Unauthorized substitutions may result in fire, electric shock, or other hazards.

**23. Safety check** – Upon completion of any service or repairs to this appliance, ask the service technician to perform safety checks to determine that the appliance is in proper operating condition.

1. Item 3 is not required except for grounded or polarized equipment.
2. Item 17 and 18 are not required except for units provided with antenna terminals.
3. Item 17 complies with UL in the U.S.A.

## 6 Special features

XD-SERIES (EN/M,T)

### **Simplified operations using large-sized, Twin Jog Dials**

#### **Multi-control jog dial (Right dial: For use in selecting a function)**

This dial allows you to set the CD program and timer-related operations while observing the operating conditions shown by the display and icons.

#### **Sound control jog dial (Left dial: For use in selecting the tone and sound field)**

This dial allows you to reproduce realistic audio by setting and registering desired equalizer patterns as well as selecting the preset equalizer patterns.

### **3D large-sized color display panel**

The large sound level meter represents the movement in music with brilliant colors to offer the joy of viewing the music at the same time as listening.

### **Dolby Pro Logic Surround, Dolby 3 Stereo Surround (XD-6...series, XD-8...series only)**

The Dolby Pro Logic and Dolby 3 Stereo are top-level surround modes that can reproduce the world of 3-dimensional audio.

### **Dolby Virtual Surround (XD-6...series, XD-8...series only)**

The Dolby Virtual Surround function offers a simulated surround effect using only the left and right front speakers.

### **Built in super woofer (XD-7...series only)**

A super woofer is built into the 3-way speaker system, allowing reproduction of heavy bass sound with incomparable powerfulness with ordinary system speaker systems.

### **CD text information display (CD TEXT compatibility)**

The text information (disc title and track titles) recorded in CDs can be displayed.

## **Demonstration**

When the power supply is restored after a power failure or the power cord is unplugged and plugged in again during use, this unit automatically starts the demonstration function (display only). During the demonstration, the display changes in sequence but the audio does not change.

#### **To cancel :**

Press the DISPLAY/DEMO key during demonstration to stop it.

#### **To switch over the demonstration :**

Turn the unit OFF (STANDBY mode) and press the DISPLAY/DEMO key.

Each press of the key switches the demonstration as shown below.

- ① "Demo on" (Demonstration executed)
- ② "Demo off" (Demonstration canceled)

## Accessories

FM indoor antenna  
(1)

AM loop antenna  
(1)

Remote control unit (1)  
Batteries (R6/AA) (2)

XD-6...series  
XD-8...series

XD-7...series

AC plug adaptor (1)

Use to adapt the plug on the power cord to the shape of the wall outlet.  
(Accessory only for regions where use is necessary.)

### Unpacking

Unpack the unit carefully and make sure that all accessories are put aside so they will not be lost.

Examine the unit for any possibility of shipping damage. If your unit is damaged or fails to operate, notify your dealer immediately. If your unit was shipped to you directly, notify the shipping company without delay. Only the consignee (the person or company receiving the unit) can file a claim against the carrier for shipping damage.

We recommend that you retain the original carton and packing materials for use should you transport or ship the unit in the future.

**Keep this manual handy for future reference.**

Speaker cords

XD-6...series, XD-8...series (2)  
XD-7...series (4)

Provided in the speaker package

Surround speaker system (Except for XD-7..series)

Surround speaker (2)

Speaker cord (2)  
Speaker stabilizer (8)

Center speaker (1)

Speaker cord (1)  
Speaker stabilizer (4)

## Connection of the system accessories

### CAUTION Note on Connection

Connect the components as shown in the diagram. Only plug the power cord into a power outlet once connections are completed. The rear panel configuration is variable depending on the models (countries or area).

### FM indoor antenna

The accessory antenna is for temporary indoor use only. For stable signal reception we recommend using an outdoor antenna. Remove the indoor antenna if you connect one outdoors.

- ① Connect to the antenna terminal.
- ② Locate the position providing good reception condition.
- ③ Fix the antenna.

### AM loop antenna

The supplied antenna is for indoor use. Place it as far as possible from the main system, TV set, speaker cords and power cord, and set it to a direction which provides the best reception.

## Speakers (XD-7...series)

System Name	Speaker Model Name
XD-702	LS-N702
XD-752/ XD-772S	LS-N752

### Speaker and TV installation

If there is a magnet or other device generating magnetic force nearby, interaction between the magnet and speaker may cause color blotching on the TV. If this happens, move the speaker at least 20 cm away from the TV set.

### Malfunction of microcomputer

If operation is not possible or erroneous display appears even though all connections have been made properly, reset the microcomputer referring to "In case of difficulty".

→ 65

1. Never short-circuit the "+" and "-" speaker cords.
2. If the left and right speaker connections or the "+" and "-" polarity are inverted, the sound will be unnatural with unclear positioning of musical instruments, etc. Be sure to connect them without mistake.
3. Be sure to insert all connection cords securely. If their connections are imperfect, the sound may not be produced or noise may interfere.
4. Before plugging or unplugging a connection cord, be sure to unplug the power cord from the wall AC outlet. If connection cords are plugged or unplugged with the power cord left plugged in, malfunction or damage may result.

## Speakers (XD-6...series, XD-8...series)

System Name	Speaker Model Name
XD-652	LS-N472
XD-852	LS-N572

### Caution regarding placement

Be sure to adhere followings. Or proper ventilation will be blocked causing damage or fire hazard.

- Do not place any objects impairing heat radiation onto the top of unit.
- Leave a space around the unit (from the largest outside dimension including projection) equal or greater than, shown below.

Top panel : 50 cm, Back panel : 10 cm

# Connection of the surround speakers (XD-6...series, XD-8...series)

## CAUTION Note on Connection

Connect the components as shown in the diagram. Only plug the power cord into a power outlet once connections are completed. The rear panel configuration is variable depending on the models (countries or area).

Before connecting the surround speakers system, be also sure to read "Surround function" and "Surround setting".

→ 55 → 56

## Surround speakers system (supplied)

## Recommended speaker installation

It is recommended that the surround speakers are installed straight to the left and right of the listening position or slightly behind, at a height of about 1 meter higher than the listener's ears. Each surround speaker should be installed so that the longer sides are horizontal.

## How to use the speaker stabilizer (cushions)

When the surround speaker system installation is unstable due to the floor condition, apply the provided stabilizer (cushions) on four positions on the bottom of each speaker.

## Hanging on a wall

The speakers can be hung on a wall by using the wall hanging holes on the back of the speaker. When hanging the speakers, select a rigid and hard place on the wall which can withstand the weight of the speakers.

1. Install a screw with sufficient strength on the wall. When screwing in, leave the head and upper stem of the screw projected by 7 to 9 mm from the wall surface.
2. Hang the speaker by inserting the screw into the wall hanging hole on the upper rear side of the speaker. Check that the speaker are firmly mounted.

- Before installation, check the wall or ceiling well to confirm that it is strong enough to withstand the weight of the speaker. KENWOOD cannot assume the responsibility against accidents caused by the drop of speaker due to insufficient mounting strength or to any defect in installation.
- The wall hanging screw is not provided. Please prepare a screw that can assure enough mounting strength according to the material and thickness (structure) of the wall where the speaker is to be hung.
- If the material or thickness of a wall or ceiling cannot be confirmed, consult a professional specialized in installation.

## Main Unit

## Speaker Unit

## Connection with other components (optional or commercially-available equipment)

### CAUTION Note on Connection

Connect the components as shown in the diagram. Only plug the power cord into a power outlet once connections are completed. The rear panel configuration is variable depending on the models (countries or area).

### MD recorder, DVD player, VCR or analog turntable

#### MD recorder/VCR

#### DVD player/analog turntable (P-110/optional)

- If an external component such as a DVD player is connected to the **MD/DVD INPUT** jacks, the **MD REC OUTPUT** jacks do not output the audio of the external component.

### Super woofer

(XD-6...series, XD-8...series only)

Extremely low sound is played back powerfully.

**Power cord**  
To wall AC outlet

### DIGITAL OUT OPTICAL jack

Remove the cap and plug the optical-fiber cable.

- Insert the optical-fiber cable straight into the connector until it clicks.
- Be sure to attach the protection cap when the connector is not used.
- Never band or bundle the optical-fiber cable.

In case an associated system component is connected, also read the instruction manual of the component.

## Surround (rear) speakers (XD-7...series only)

(RS-N852/optional)

### In regard to the SURROUND switch

This switch can be used only when the separately sold surround (rear) speakers are connected. When the switch is set to ON, surround playback can be enjoyed. When this switch is set to OFF, normal playback is executed.

- Please operate this switch while the power is switched off.
- We recommend to keep this switch set to OFF when no surround (rear) speakers are connected to obtain a better sound quality.
- When the switch is set to OFF, no sound will come from the surround (rear) speakers.

### Main Unit

### Speaker Unit

## FM outdoor antenna

Lead the  $75\Omega$  coaxial cable connected to the FM outdoor antenna into the room and connect it to the FM  $75\Omega$  terminal.

Use a commercially-available antenna adapter (a small-sized model).

## Reception mode switching of FM broadcast (For Russia)

When you want to receive an FM broadcast in PILOT TONE mode, changing the setting as follows.

① Select the TUNER input.

② While holding the SELECT key depressed, turn the SOUND CONTROL jog dial to select the system mode.

① POLAR system  
② PILOT TONE system

Polar → Pilot

③ Establish the selection.

## Display

The displays given in this manual are approximations only. They may differ from what actually appears on the display.

### XD-7...series, XD-8...series

#### ① Cassette deck-related indicators

This section contains the cassette deck operation indicators. The indicated information includes the tape reverse mode and tape transport direction.

#### ② Sound level meter

The display varies according to the music or the operations of the CD, tape, etc.

During the volume adjustment, this meter displays the current sound level as a reference.

#### ③ Timer-related indicators

#### ④ XD-7...series :

**Equalizer/3D surround/“S. direct” indicators**

#### XD-8...series :

**Equalizer/DSP/“S. direct” indicators**

#### ⑤ CD player-related indicators

This section contains the CD play and pause mode indicators. It also shows the track numbers in the current disc.

#### ⑥ REPEAT/PGM indicators

#### ⑦ Sleep timer indicator

#### ⑧ Tuner-related indicators

#### ⑨ Character information display

Displays the input selection, frequency, volume level, etc.

#### ⑩ Guideline

Blinks during the setting of an item using the jog dial.

### XD-6...series

#### ① Cassette deck-related indicators

This section contains the cassette deck operation indicators. The indicated information includes the tape reverse mode and tape transport direction.

#### ② Sound level meter

The display varies according to the music or the operations of the CD, tape, etc.

During the volume adjustment, this meter displays the current sound level as a reference.

#### ③ Timer-related indicators

#### ④ Equalizer/DSP/“S. direct” indicators

#### ⑤ CD player-related indicators

This section contains the CD play and pause mode indicators. It also shows the disc number being selected.

#### ⑥ EX.BASS indicator

#### ⑦ PGM/RPT. indicators

#### ⑧ Tuner-related indicators

#### ⑨ Character information display

Displays the input selection, frequency, volume level, etc.

#### ⑩ Guideline

Blinks during the setting of an item using the jog dial.

## Main unit

### Preparation section

## CD player unit

### 24 DISC SELECTOR keys

The disc for playback (or recording) is selected.

→ 25

### DISC SELECTOR indicators

(XD-7...series, XD-8...series only)

The indicators corresponding to the trays accommodating discs light up. During playback of a CD, the indicator corresponding to the CD blinks.

### 26 Disc tray

Three discs can be stored.

→ 24

### 27 CD operation keys

Play/pause (▷/II) key  
Stop (□) key

→ 24 → 25

### 28 Tray open/close (▲ OPEN) key

The disc tray is opened and closed.

→ 24

### 25 DISC SKIP key

The disc for playback (or recording) is selected. This is also used for insertion of a CD to the inside of the disc tray.

→ 25

**Receiver****① ON/STANDBY (I / ⊖) key**

Power ON/OFF switching is executed.

→ [22]

**② STANDBY indicator**

The indicator lights up when the power is set to the STANDBY mode.

→ [23]

**TIMER indicator**

The indicator lights up together with the STANDBY indicator when the power is set to the STANDBY mode after having activated a timer program.

→ [60] → [63]

**③ PHONES jack**

For connection of a headphone (optional).

→ [22]

**④ SOUND CONTROL jog dial**

→ [12] → [18] → [19] → [20] → [52] → [53]

Turn this dial to select or cancel the equalizer pattern, etc.

**⑤ MULTI CONTROL jog dial**

→ [18] → [19] → [25] → [30]

Turn this dial to select optimum modes according to the desired operations.

When the CD input is selected, this dial is used to skip tracks.

When the TUNER input is selected, this dial is used to select a station.

**⑥ MENU key**

→ [18] → [19]

Press to switch the mode set with the **MULTI CONTROL** jog dial ON or OFF. The item selected by this key is variable depending on the current operation mode.

**MENU indicator****(XD-7...series, XD-8...series only)**

The indicator starts to blink when the **MENU** key is pressed.

**⑦ BACK key**

→ [18] → [19]

Press when setting a mode using the **MULTI CONTROL** jog dial to return to the previous step and restart the operation from there.

**⑧ Display****⑨ Icon indicators****(CD PGM, REC. , DUBBING, AUDIO, CLOCK, SURROUND)**

→ [18] → [19]

When a mode is set using the **MULTI CONTROL** jog dial, the icon indicators corresponding to the current mode light up.

(The **SURROUND** icon is displayed only with the XD-6... series, XD-8...series models.)

**Cassette deck unit****⑩ A deck cassette holder**

Press the area marked **▲ PUSH OPEN** to load or eject a tape.

**⑪ DOLBY NR key (XD-7...series, XD-8...series only)**

→ [33]

Dolby noise reduction ON/OFF switching is executed.

**TAPE EQ. key (XD-6...series only)**

→ [27]

Press to switch the Tape Equalizer on and off.

**⑫ REV. MODE key**

→ [27] → [33]

The reverse mode of the deck (both sides, repeated, one side) is switched.

**⑬ B deck cassette holder**

Press the area marked **▲ PUSH OPEN** to load or eject a tape.

**⑭ RDS-related indicators****(For U.K., Europe and Russia)**

→ [41]

**Surround-related indicators****(XD-6...series, XD-8...series only)**

→ [53]

**⑮ Tuner operation keys****BAND key**

Press to switch the receiving band.

**TUNING MODE key**

Switches the tuning mode.

→ [22]

**⑯ VOLUME CONTROL knob**

This is used for volume adjustment.

→ [22]

**⑰ INPUT key**

Press to select the input source. When TAPE or CD is selected, playback starts automatically provided that a tape or disc has already been loaded.

**DISPLAY/DEMO key**

Switches the displayed information.

→ [6] → [34]

**When power is STANDBY:**

Switches the demonstration on and off.

**⑯ EX. BASS (Extra bass) key****(XD-6...series, XD-8...series only)**

→ [23]

Switches the extra bass play on and off.

**EX.BASS indicator (XD-8...series only)**

→ [23]

**SUPER WOOFER key (XD-7...series only)**

→ [23]

Press to switch the super woofer on and off.

**SUPER WOOFER indicator (XD-7...series only)**

→ [23]

**⑯ SELECT key**

→ [18] → [19] → [58]

Used for setting of various modes or establishing a selection.

**When power is STANDBY:**

Used for displaying the time. (When this key is pressed while the "TIMER" indicator is lit, the "PROG." or "O.T.T." indicator also lights up, the timer reservation setting mode is displayed, then the display returns to the previous condition.)

**⑯ ENTER key**

→ [18] → [19]

Used for entering a selected mode in memory or executing it.

**⑯ Cassette deck operation keys**

→ [26] → [27]

**Play (◀ ▶) keys****Stop (□) key****Fast forward and rewind (◀◀ ▶▶) keys**

→ [26]

**⑯ A/B key**

Press to select the deck to be operated.

**(For U.K. and Russia)**

→ [34]

Used as the beat cancel key during recording of AM(MW)/ LW broadcasting.

**⑯ REC/ARM key**

→ [33] → [34]

Press to start recording. Pressing the key during recording stops it after leaving a non-recorded space (blank) of about 4 seconds.

## Remote control unit (XD-7...series)

The keys on the remote control unit with the same names as on the main unit have the same function as the keys on the main unit.

For U.K., Europe and Russia : RC-752E  
Other countries : RC-752

### ① I / $\downarrow$ POWER key

→ 22

Power ON/OFF switching is executed.

### ② RDS-related keys (For U.K., Europe and Russia)

→ 44

#### TA/NEWS key

Used for automatic reception of transmissions of a certain content.

#### RDS DISP. key

→ 41

The display contents are switched during reception of RDS broadcasts.

#### PTY key

→ 42

This is used to specify the program type when searching for a station.

### ③ Numeric keys

→ 25

Used as number keys when the input is CD or TUNER.

### ④ DISC SKIP key

→ 25

### ⑤ TIME key

→ 25

Press to switch the time information on the CD player unit.

### ⑥ RANDOM key

→ 40

For CD playback, switching is executed between random playback and normal playback.

### ⑦ TAPE play (◀ ▶) keys

→ 26

### ⑧ TAPE A/B key

→ 26

### ⑨ BACK key

→ 18

### ⑩ SELECT key

→ 18

### ⑪ ENTER key

→ 18

### ⑫ SOUND CONTROL key

→ 18

Press to select or cancel the equalizer and 3D surround settings.

### ⑬ SUPER WOOFER key

→ 23

### ⑭ INPUT key

→ 22

### ⑮ BAND key

→ 30

### ⑯ TEXT DISP. key

→ 46

### ⑰ REPEAT key

→ 38

Used for repeated playback of a CD.

### ⑱ TUNING (◀◀ ▶▶) keys (CD/TAPE/TUNER)

→ 25 → 27 → 30

When the CD or TAPE input is selected, press to fast forward or backward (rewind) the disc or tape.

When the TUNER input is selected, press to select a station.

### ⑲ MUTE key

→ 23

This is used to mute the sound temporarily.

### ⑳ MENU key

→ 18

### ㉑ CD play/pause (▶/II) key

→ 24

#### Stop (■) key

→ 25

→ 31

### ㉒ MULTI CONTROL/VOLUME keys

→ 18

→ 22

#### Skip/preset call (◀◀, ▶▶) keys (CD/TUNER)

→ 25

→ 31

The left and right keys have the same functions as the MULTI CONTROL jog dial on the main unit.

When the CD input is selected, press to skip forward or backward on the disc.

When the TUNER input is selected, press to select preset station.

The top and bottom keys are used to adjust the volume.

## Remote control unit (XD-6...series, XD-8...series)

The keys on the remote control unit with the same names as on the main unit have the same function as the keys on the main unit.

For U.K., Europe and Russia : RC-852E  
Other countries : RC-852

⑤ **SELECT key**

→ [19]  
→ [19]

⑥ **ENTER key**

→ [25] → [27] → [30]

⑦ **TUNING (◀◀ ▶▶) keys (CD/TAPE/TUNER)**

When the CD or TAPE input is selected, press to fast forward or backward (rewind) the disc or tape.  
When the TUNER input is selected, press to select a station.

⑧ **Stop (■) key**

→ [25] → [31]

⑨ **CD play/pause (▶/II) key**

→ [24]

⑩ **TAPE play (◀ ▶) keys**

→ [26]

⑪ **TAPE A/B key**

→ [26] → [34]

⑫ **DISC SKIP key**

→ [25]

⑬ **TEXT DISP. key**

→ [46]

⑭ **TIME key**

→ [25]

Press to switch the text information recorded in a CD TEXT disc.  
Press to switch the time information on the CD player unit.

⑮ **SOUND CONTROL key**

→ [19] → [53]

⑯ **EX. BASS key**

→ [23]

⑰ **LISTEN MODE key**

→ [53]

Press to select surround playback mode.

⑱ **INPUT key**

→ [22]

⑲ **BAND key**

→ [30]

⑳ **MUTE key**

→ [23]

This is used to mute the sound temporarily.

㉑ **MULTI CONTROL/VOLUME UP, DOWN keys**

→ [19] → [22]

Skip/preset call (◀◀, ▶▶) keys (CD/TUNER)

→ [25] → [31]

The left and right keys have the same functions as the **MULTI CONTROL** jog dial on the main unit.

When the CD input is selected, press to skip forward or backward on the disc.

When the TUNER input is selected, press to select preset station.

The top and bottom keys are used to adjust the volume.

㉒ **MENU key**

→ [19]

㉓ **REPEAT key**

→ [38]

Used for repeated playback of a CD.

㉔ **RANDOM key**

→ [40]

For CD playback, switching is executed between random playback and normal playback.

① **I /  $\square$  POWER key**

→ [22]

Power ON/OFF switching is executed.

② **RDS-related keys (For U.K., Europe and Russia)**

→ [44]

TA/NEWS key

Used for automatic reception of transmissions of a certain content.

RDS DISP. key

→ [41]

The display contents are switched during reception of RDS broadcasts.

PTY key

→ [42]

This is used to specify the program type when searching for a station.

③ **Numeric keys**

→ [25]

Used as number keys when the input is CD or TUNER.

④ **BACK key**

→ [19]

This unit has two jog dials named the **MULTI CONTROL** and **SOUND CONTROL** jog dials.

The **MULTI CONTROL** jog dial makes it possible to set (establish) many functions in a simple procedure. When the  **MENU** key is pressed, the icon indicators light according to the **MULTI CONTROL** jog dial operation so you can select the desired mode based on a more intuitive method.

### SOUND CONTROL jog dial

The **SOUND CONTROL** jog dial (or the **SOUND CONTROL** key on the remote control unit) makes it possible to select a tone or sound effect in an easy procedure.

→ 52

The following items can be selected by turning the **SOUND CONTROL** jog dial.

- "Rock" ..... Rock music
- "Pop" ..... Pop music
- "Jazz" ..... Jazz music
- "Classic" ..... Classical music
- "Disco" ..... Disco music
- "Movie" ..... Movie music
- "3D Level 1" ..... 3D surround level 1
- "3D Level 2" ..... 3D surround level 2
- "Custom EQ 1"    Equalizer's manual
- "Custom EQ 2"    memory created by the user
- "Custom EQ 3"
- "S. direct" ..... Pure sound reproduction by turning the equalizer or 3D surround circuitry off.
- "Effect off" ..... Normal playback

In the **MULTI CONTROL** setting mode (while the guideline is blinking), the **BAND** and play keys are defeated and inoperative.

### Icon indication example:

When "Tape Dubbing" is selected with the **MULTI CONTROL** jog dial (or the **MULTI CONTROL** key on the remote control unit), the "DUBBING" icon indicator lights up.

### MULTI CONTROL jog dial

- 1 Press the  **MENU** key to enter the **MULTI CONTROL** setting mode.
- 2 Select an operation mode by turning the **MULTI CONTROL** jog dial (or pressing the **MULTI CONTROL** keys on the remote control unit).
- 3 Set, establish or execute (determine) items by pressing the **SELECT** key and/or **ENTER** key.

#### Display examples

The following items can be selected by turning the **MULTI CONTROL** jog dial.

The messages inside ( ) may not be displayed under certain situations.

##### → ("CD Program Play")

Only when the CD input is selected

##### ("Recording Options")

Only when a recordable tape is loaded in Deck B

##### ("Tape Dubbing")

Only when the TAPE input is selected, the tape to be played is loaded in Deck A and a recordable tape is loaded in Deck B

##### ("Audio Options")

##### → ("Clock Options")

- To cancel the mode for setting (using) **MULTI CONTROL**, read the description of each item in this manual.
- Press the **BACK** key to return to the previous step and restart operation from there. (The **BACK** key is inoperative once scrolling message "Press 'ENTER' to Start" has been displayed.)

This unit has two jog dials named the **MULTI CONTROL** and **SOUND CONTROL** jog dials.

The **MULTI CONTROL** jog dial makes it possible to set (establish) many functions in a simple procedure. When the  **MENU** key is pressed, the icon indicators light according to the **MULTI CONTROL** jog dial operation so you can select the desired mode based on a more intuitive method.

### Icon indication example:

When "Tape Dubbing" is selected with the **MULTI CONTROL** jog dial (or the **MULTI CONTROL** key on the remote control unit), the "DUBBING" icon indicator lights up.

## SOUND CONTROL jog dial

The **SOUND CONTROL** jog dial (or the **SOUND CONTROL** key on the remote control unit) makes it possible to select a tone or sound effect in an easy procedure.

→ 53

The following items can be selected by turning the **SOUND CONTROL** jog dial.

- "Rock" ..... Rock music
- "Pop" ..... Pop music
- "Jazz" ..... Jazz music
- "Classic" ..... Classical music
- "Hall"
- "Disco"      [ DSP (Digital Signal Processor) playback ]
- "Live"        [ Surround play modes ]
- "Church"
- "Dolby Pro logic"
- "Dolby 3 stereo"      [ Surround play modes ]
- "Dolby Virtual surround"
- "Custom EQ 1"      [ Equalizer's manual memory created by the user ]
- "Custom EQ 2"      [ Equalizer's manual memory created by the user ]
- "Custom EQ 3"      [ Equalizer's manual memory created by the user ]
- "S. direct" ..... Pure sound reproduction by turning the EX.BASS, equalizer, DSP play and surround circuitry off.
- "Effect off" ..... Normal playback

## MULTI CONTROL jog dial

- 1 Press the  **MENU** key to enter the **MULTI CONTROL** setting mode.
- 2 Select an operation mode by turning the **MULTI CONTROL** jog dial (or pressing the **MULTI CONTROL** keys on the remote control unit).
- 3 Set, establish or execute (determine) items by pressing the **SELECT** key and/or **ENTER** key.

### Display examples

The following items can be selected by turning the **MULTI CONTROL** jog dial.

The messages inside ( ) may not be displayed under certain situations.

- ("CD Program Play")  
Only when the CD input is selected
- ("Recording Options")  
Only when a recordable tape is loaded in Deck B
- ("Tape Dubbing")\*  
Only when the TAPE input is selected, the tape to be played is loaded in Deck A and a recordable tape is loaded in Deck B
- ("Audio Options")
- ("Clock Options")
- ("Surround Setup")

\* "Tape Dubbing" cannot be selected during DSP or surround playback.

- To cancel the mode for setting (using) **MULTI CONTROL**, read the description of each item in this manual.
- Press the **BACK** key to return to the previous step and restart operation from there. (The **BACK** key is inoperative once scrolling message "Press 'ENTER' to Start" has been displayed.)

In the **MULTI CONTROL** setting mode (while the guideline is blinking), the **BAND** and play keys are defeated and inoperative.

### Loading batteries

#### ① Remove the cover.

XD-6...series  
XD-8...series

#### ② Insert batteries.

- Insert two R6 ("AA"-size) batteries following the polarity indications.

#### ③ Close the cover.

Operating range  
(approx.)

### Operation

Plug the power cord into the mains power outlet and press the on/standby (I /  $\odot$  POWER) key of the remote control unit to turn power ON. After the power has been turned ON, press the desired key.

To turn power off, press the on/standby (I /  $\odot$  POWER) key again.

The power mode enters the STANDBY mode in which the "STANDBY" indicator lights up. (The "TIMER" indicator also lights in this mode if a timer program has been activated.)

- When pressing more than one remote control keys successively, press the keys securely by leaving an interval of 1 second or more between keys.

- The provided batteries are intended for use in operation checking, and their service life may be short.
- When the remote controllable distance becomes short, replace both of the batteries with new ones.
- If direct sunlight or the light of a high-frequency fluorescent lamp (inverter type, etc.) is incident to the remote sensor, malfunction may occur. In such a case, change the installation position to avoid malfunction.

### CHANNEL SPACE setting

(Except for the U.S.A., Canada, U.K., Europe, Australia and Russia)

The space between radio channels has been set to the one that prevails in the area to which the system is shipped. However, if the current channel space setting does not match the setting in the area where the system is to be used, for instance when you move from area 1 or area 2 shown in the following table or vice versa, proper reception of AM/FM (MW/FM) broadcasts cannot be expected. In this case, change the channel space setting in accordance with your area by referring to the following table.

Area	CHANNEL SPACE freq.
① USA, Canada and South American countries	FM : 100 kHz AM : 10 kHz
② Other countries	FM : 50 kHz AM : 9 kHz

#### ① Select the TUNER input.

#### ② While holding the SELECT key depressed, turn the SOUND CONTROL jog dial to select the system mode.

- ① "FM100/AM10 kHz" STEP,
- ② "FM 50/AM 9 kHz" STEP,

FM100/AM10 kHz  $\rightarrow$  FM 50/AM 9 kHz

- The "AM" display is variable depending on the model (country or area), and "MW" may be displayed in some areas.

#### ③ Establish the selection.

## Disc handling precautions

### Handling

Hold the discs so that you do not touch the playing surface.

Do not attach paper or tape to either the playing side or the label side of the discs.

### Cleaning

If fingerprints or foreign matter become attached to the disc, lightly wipe the disc with a soft cotton cloth (or similar) from the center of the disc outwards in a radial manner.

### Storage

When a disc is not to be played for a long period of time, remove it from the player and store it in its case.

## Discs which can be played with this unit

CD (12 cm, 8 cm), and the audio part of CDV, CD-G, CD-EG and CD-EXTRA.

Use discs that comply with the IEC standard, for example a disc carrying the  marking on the label surface.

## Never play a cracked or warped disc

During playback, the disc rotates at high speed in the player. Therefore, to avoid danger, never use a cracked or deformed disc or a disc repaired with tape or adhesive agent. Please do not use discs which are not round because they may cause a malfunction.

## Disc accessories

The disc accessories (stabilizer, protection sheet, protection ring, etc.) which are marketed for improving the sound quality or protecting discs as well as the disc cleaner should not be used with this system because they may cause malfunction.

## Notes on cassette tape

### Safety tab (accidental erasure prevention tab)

After an important recording has been finished, break the safety tab, to prevent the recorded contents from being erased or recorded on accidentally.

### To re-record

Apply tape only to the position where the tab has been removed.

### To store cassette tapes

Do not store the tapes in a place which is subject to direct sunlight, or near equipment that generates heat. Keep the cassette tapes away from any magnetic field.

### When there is slack in the tape

In such a case, insert a pencil into the reel hole and wind the reel hub to remove the slack.

### 1. Longer tape than 110 minutes cassette tape

Since longer tape than 110 minutes cassette tape is very thin, the tape could adhere to the pinch roller or be easily cut. It is recommended that these tapes not be used with this unit to prevent possible damage.

### 2. Endless tapes

Do not use an endless tape, as this could damage the mechanism of the unit.

### Basic use method

#### Reproducing sound with enhanced bass

XD-6...series  
XD-8...series

#### Listening through headphones

Insert the headphone plug into the PHONES jack.

- The sounds from all speakers are cut off.
- The "Effect off" mode will be automatically engaged during DSP playback or surround playback.

XD-7...series

Muting the sound temporarily

Reproducing sound with enhanced bass

### 1. Switching the power ON (OFF)

When the power is ON, pressing the ON/STANDBY key enters the power STANDBY mode, in which the standby indicator lights up.

#### One-touch operation function

The power can also be turned ON by pressing the play key of the CD player, the play key of the cassette deck or the BAND key of the tuner. It is also possible to turn the power ON by simply pressing the ▲ OPEN key.

INPUT

### 2. Selecting the desired output

- ① TUNER (Radio) → 30
- ② CD → 24
- ③ TAPE → 26
- ④ MD/DVD (External input) → 11 → 51

- If you select the MD/DVD (external input) mode, also read the instruction manual of the component connected to the MD/DVD INPUT jacks.

VOLUME  
CONTROL

### 3. Volume adjustment

- The display shows a reference value. (The reference value is also shown visually by the sound level meter.)

## Reproducing sound with enhanced bass (EX. BASS) (XD-6...series, XD-8...series only)

- Each press switches EX.BASS on and off alternately.
- The EX.BASS is switched off automatically during recording or when the **SOUND CONTROL** jog dial is turned.

## Muting the sound temporarily (Remote control unit only)

- Press again to resume the original volume.
- The sound muting is also canceled when the volume is controlled.

- When the CD or TAPE input is selected and a disc has been loaded in the disc tray or a tape has been loaded in the deck for use in playback, playback starts at the same time.

When CD has been selected.

CD @1 0:00

Volume 19

Volume display

## Reproducing sound with enhanced bass (Super woofer) (XD-7...series only)

- Each press switches the super woofer on and off alternately.

### Super woofer level adjustment

Adjust the super woofer level according to the category of music and your liking.

#### 1 Select "Audio Options".

#### 2 Select "SW Level".

#### 3 Adjust.

## Standby mode

While the "STANDBY" indicator of the unit is lit, a small amount of current is flowing into the unit to back up its internal memory. (The TIMER indicator also lights if a timer program has been activated before entering the STANDBY mode.)

This condition is referred to as the standby mode of the unit. While the unit is in the standby mode, it can be turned ON from the remote control unit.

This unit has been designed to minimize power consumption.

# Playback of CD

If a disc has already been loaded in the CD player and the power is OFF, simply pressing the CD play key turns power automatically ON and starts playback.

## Playback from desired track

XD-6...series  
XD-8...series

XD-7...series

TIME

DISC SKIP

Start playback/  
To pause playback

## Skipping tracks

To stop playback

Playback from desired track

The tray opens when the key is pressed and closes when the key is pressed again.

## 1. Load a disc.

- ① Open the tray.
- ② Place a disc.
- ③ Close the tray.

Disc played first when the  $\triangleright/\parallel$  key is pressed.

The label must be on top.

## 2. Start playback.

XD-7...series  
XD-8...series

The recorded track No. are shown.

- After a few seconds, play starts from track No.1.
- Playback stops after having played all discs in the trays. (Relay play)
- When the **▲ OPEN** key is pressed during playback, the tray opens but the playback continues. (The **DISC SKIP** key is inoperative at this time.)

## Skipping tracks

- The tracks in the direction the dial is rotated are skipped, and the selected track will be played from the beginning.
- When the jog dial is rotated a little in the direction of counterclockwise once during playback, the track being played will be played from the beginning.
- The CD tracks can also be skipped using the **◀◀** or **▶▶** key of the remote control unit.

## High-speed search in forward and reverse directions (Remote control unit only)

- Playback starts from the position where the key is released.

- Do not touch the played side of disc.
- Rotate the tray with the **DISC SKIP** key to insert the third disc.
- The tray containing the disc to be played should come to the front right position when the unit is seen from the front.

## XD-6...series

The selected disc is indicated.

Lights when a disc is inserted at the time of playback.

## Playback from desired track

## To pause playback

- Each press pauses and plays the CD alternately.

## To stop playback

## Time display on the CD player

Each press of the **TIME** key of the remote control unit switches the displayed time information.

- ▶ ① **1:12** Elapsed time of track being played
- ② **-4:18** Remaining time of track being played
- ③ **12:46** Elapsed time of disc ("TOTAL" lights up)
- ④ **-63:14** Remaining time of disc ("TOTAL" lights up)

- Only the elapsed time of the track being played is displayed during program playback, random playback and single-track repeated playback.

# Playback of tape

By loading a tape in the cassette deck to be used in playback beforehand, simply pressing the play key automatically turns the power ON and starts playback.

## 1. Load a cassette tape.

- 1 Open the door.
- 2 Insert a tape and close the door.

## 2. Select the deck to be used for playback.

## 3. Start playback.

Press the play key of the desired direction.

- When playing back a source which has been recording using the equalizer or 3D surround effect, select “Effect off” with the **SOUND CONTROL** jog dial. (3D surround : XD-7...series only)

→ 52 → 53

## To wind tape at high speed

To fast wind in direction ←

To fast wind in direction →

- Press the □ key to stop fast winding.

## Selection of reverse mode (Main unit only)

Each press switches the modes as follows.

- ① "—" .... Playback stops after having played both sides of tape in a deck.  
(Relay play : → 28)
- ② "(—)" ... Endless playback of both sides of tape.
- ③ "—" ..... Playback stops after having played one side of tape.

- Normal (TYPE I), high (TYPE II), or metal (TYPE IV) tape selection is set automatically.
- Remove tape slack before loading.
- Close the door securely.

XD-7...series  
XD-8...series

Reverse mode indication.  
Displays the selected deck.

Lights up when a tape is present in the deck in use.

XD-6...series

## Selection of Tape Equalizer (Main unit only) (XD-6...series only)

Select Tape Equalizer only when playing back a tape recorded with Dolby Noise Reduction. (A tape recorded without Dolby NR cannot be reproduced in normal audio if Tape Equalizer is selected when playing it.)

Lights up when Tape Equalizer is on.

Each press switches the modes as follows.

- ① "T. EQ" ON ..... Tape Equalizer is used
- ② "T. EQ" OFF ..... Tape Equalizer is not used

- The Tape Equalizer is effective for reduction of higher-frequency noise.

## To stop playback

- Do not take out the cassette tape until the tape transport has stopped completely.

## Transport direction indicators

The indicators (◀, ▶) indicate the current direction in which the tape advances when playback or recording is started automatically by the one-touch operation function, etc. This direction is the direction stored in memory when the tape was last stopped.  
(To switch the tape transport direction, press the play key corresponding to the desired direction then press the stop (□) key.)

Tape direction indicators of currently selected deck.

XD-7...series  
XD-8...series

XD-6...series

- If the tape transport direction is opposite to the desired direction, press the play key corresponding to this.

## ***Relay play***

**When tapes are set in the decks A and B and the reverse mode is set to “ $\leftrightarrow$ ” (play of both sides), play of the second deck will be started automatically after play of the first deck has been completed. Tape play will be repeated alternately.**

- Relay play is not possible in the reverse modes “ $(\leftrightarrow)$ ” and “ $\underline{\leftrightarrow}$ ”.
- If a tape is loaded only in either deck, playback stops after having played both sides of the tape.

## ***A tip for use of the tape counter***

**The tape counter is set to “0000” when a cassette tape is loaded. By writing down the counter reading in case you want to interrupt recording (playback) in the middle of the tape, the memo will be helpful as a reference for locating the same position when continuing the recording (playback) the next time. The tape counter figure decrements during recording or playback of the back side (while the  $\blacktriangleleft$  tape transport indicator is lit).**

**To set the tape counter to “0000”, open the cassette holder once. Then the counter will be reset.**

TAPE 0000

## Searching for the desired music program (DPSS) (XD-7...series, XD-8...series only)

The DPSS (Direct Program Search System) is capable of detecting non-recorded spaces of more than 4 seconds as "blanks between programs" and, based on this information, can return to the beginning of the music program being played or the beginning of a desired program by skipping up to 16 other programs.

### During play in direction ►

To play the next program : Press once.

To play the 4th program after the current program : Press 4 times.

To return to the beginning of the current program : Press once.

To play the 4th program before the current program : Press 5 times.

### During play in direction ▲

To return to the beginning of the current program : Press once.

To play the 4th program before the current program : Press 5 times.

To play the next program : Press once.

To play the 4th program after the current program : Press 4 times.

The DPSS may not function normally with the following kinds of tape.

- Tapes containing several no-sound intervals of more than 4 seconds, such as conversation and talk tapes.
- Tapes containing pianissimo sections, such as classical music tape.
- Tapes in which large noise is recorded in blanks between programs.
- Tapes containing blanks between programs that are shorter than 4 seconds.
- Tapes recorded at low level.
- Tapes recorded by cross-fade recording (in which the beginning of next program is overlapped on the end of previous program).

## Collective presetting of stations (auto preset)

Keep the TUNING MODE key depressed (about 2 seconds).

(For U.K., Europe and Russia)

(Other countries)

- Some stations may not be able to be preset if their reception conditions are weak.
- A maximum of 30 stations are preset automatically by giving the priority to the FM band.
- When there are many stations and the intended station has not been preset, please also use **"One-by-one presetting (manual preset)"**.
- The stations which have been preset are overwritten.

Example when an FM station is received

- Use the manual tuning mode when reception is noisy due to weak reception. (In the manual mode, stereo broadcasts are received in monaural.)
- Normally, use the **"AUTO"** (Auto tuning) mode.
- If you are operating the remote control unit, the **"AUTO"** (Auto tuning) and manual tuning mode can be alternated by pressing the stop (■) key.

## When stations have been memorized (Preset call)

Turn the MULTI CONTROL jog dial to select a station.  
(On the remote control unit, press the  $\blacktriangleleft$  or  $\triangleright$  key.)

- When a key is held depressed, preset stations will be skipped at an interval of about 0.2 second.
- Preset stations can also be recalled using the numeric keys of the remote control unit.

## One-by-one presetting (manual preset)

1 Press the ENTER key during reception.

Presetting is cancelled when no operation is executed for 5 seconds or more.

2 Select one of the preset numbers from 1 to 30.

Presetting is cancelled when no operation is executed for 5 seconds or more.

3 Press the ENTER key again.

- Repeat steps 1 2 3 to preset other stations.
- If several stations are preset under the same number, the previous memory is replaced with the latest memory contents.

Lights during stereo reception

Lights during auto tuning

The "Y" indicator lights when a station is received

Frequency display

**Recording on TAPE**

**Note** Note that this cassette deck cannot record onto Metal tapes.

**XD-7...series:** The equalizer or 3D surround effect applied to the audio can be recorded together with it. → [52](#)

**XD-6...series, XD-8...series:** The equalizer effect applied to the audio can be recorded together with it, but the effects obtained by surround playback or DSP playback cannot be recorded together with the audio. → [53](#)

**XD-6...series**  
**XD-8...series**

**XD-7...series**

### 1. Load a cassette tape. (Recording is available on deck B only.)

- 1 Open the door of deck B.
- 2 Insert a tape.
- 3 Close the door.

- Differentiation between normal (TYPE I) and high (TYPE II) tape is set automatically.
- Remove tape slack before loading.

### 2. Select the tape transport direction.

To reverse the transport direction

- 1 Select deck B by pressing the A/B key.
- 2 Press the play key corresponding to the desired direction.
- 3 Stop playback (by pressing the □ key).

- When recording is started, the tape is transported in the direction selected in this step.
- Wind the tape to the position where recording is to be started.

Check the tape transport direction indicator. → [27](#)

### 3. Set the recording condition.

- 1 Select the reverse mode.
- 2 Select the DOLBY NR mode. (XD-7...series, XD-8...series only)

- The Tape Equalizer cannot be used in recording. (XD-6...series only)

→ [33](#)

→ [33](#)

## To pause recording (Main unit only)

## Selection of the reverse mode (Main unit only)

Select an input source other than "TAPE".

## 4. Select the source to be recorded.

- ① TUNER (Radio)
- ② CD
- ③ TAPE (This source cannot be recorded.)
- ④ MD/DVD (External input)  
(Input level adjustment - [51])

CD 01 1 : 1 2

The input source component to be recorded should be displayed.

- If a disc has already been loaded when the CD input is selected, it will start to play automatically. In this case, press the stop (□) key to stop it.

## 5. Start recording.

- 1 Start recording.
- 2 Play (or tune) the input source to be recorded.

- Even if deck A is selected, it is automatically switched to deck B at the start of recording.
- Recording stops automatically when the tape side(s) to be recorded have been fully recorded.
- Press the stop (□) key of the cassette deck unit to stop recording.

### Points in CD recording

When recording CD tracks onto a tape, if you leave the cassette deck in record-pause mode beforehand, the cassette deck recording can be started at the same time as the CD starts to be played. (Synchro recording function)

- ① Put the CD player in pause mode.
- ② Select the track to be recorded with the skip (◀◀, ▶▶) keys.  
(The CD player pauses at the beginning of the selected track.)
- ③ Put the cassette deck in Record-pause mode.  
(Press the REC/ARM key twice.)
- ④ Start playing the CD.  
(Synchro recording starts.)

- Recording stops when the stop (□) key of the CD player is pressed.

### Beat cancel function (For U.K. and Russia)

There may be cases in which beat noise interferes with recording of AM(MW)/ LW broadcasting.

In such a case, press the A/B key during recording to reduce or suppress the beat noise.

### Switching the sound level meter display mode

Each press switches the modes as follows.

- ▶ "Display Auto"
- "Display 1"
- "Display 2"
- "Display 3"

- Although the display will change according to the music when "Display 1" or "Display 2" is selected, when "Display 3" is selected, the display will change regardless of the music.
- When "Display Auto" is selected, the display mode during CD playback changes to "Display 1", "Display 2" and "Display 3" every time the track changes.

## Copying tape (Tape dubbing)

The contents of the tape in deck A can be copied onto the tape in deck B.

### Load tapes in the decks.

### ① Select the "TAPE" input.

### ② Press the stop key.

### ③ Select "↔" (double-side recording) or "→" (one-side recording).

→ 33

### ④ Select "Tape Dubbing".

The following items can be selected by turning the MULTI CONTROL jog dial.

#### → "Recording Options"

##### "Tape Dubbing"

##### "Audio Options"

##### "Clock Options"

#### → "Surround Setup" (Except for XD-7...series)

→ Scrolled display (Tape Dubbing)

Tape Dubbi

Lights

### XD-6...series, XD-8...series :

• "Tape Dubbing" cannot be selected during DSP or surround playback. In these modes, select another equalizer pattern and retry.

→ 53

**The DOLBY NR or TAPE EQ. key is ineffective during dubbing.**

**The tape recorded on deck B assumes the same Dolby NR condition as the tape played on deck A.**

### ⑤ Use the same tape transport directions.

- When recording is started, the tape will be transported in the direction selected in this step.  
( → :side A, ← : side B)

#### (1) Select the transport direction of deck A.

#### (2) Select the transport direction of deck B.

### ⑥ Start dubbing.

→ Scrolled display (Press 'ENTER' to Start)

Press 'ENT'

- Dubbing ends automatically when the side(s) to be dubbed has been completed.

### To stop dubbing

- The deck B will stop after creating a non-recorded portion of about 4 sec, and then the deck A will stop.
- Dubbing can also be stopped by pressing the stop (□) key of the cassette deck unit. Note that the non-recorded space is not created in this case.

## Listening in the desired sequence (program playback)

Any titles on the discs in the tray can be listened to in the desired sequence. (Max. 32 titles)

Select the "CD" input.

### 1 Check that the CD player is in the stop mode.

If it is in play mode

### 2 Select "CD Program Play".

### 3 Enter track No.s in the order you want to play them.

#### ① Select the disc.

#### ② Select the track.

(To select other tracks, repeat steps ① and ② for each of the additional tracks.)

#### ③ Press the ENTER key.

(Go to step ⑤ if you do not need to check the program contents.)

- If the operation in step ② is performed during playback of a track, the current track can be programmed as the first track in the program.

The following items can be selected by turning the MULTI CONTROL jog dial.

- "CD Program Play"
- (“Recording Options”)
- “Audio Options”
- “Clock Options”
- “Surround Setup” (Except for XD-7...series)

← Scrolled display (CD Program Play)

Lights

CD Program

← Scrolled display (Select Disc/Track No.)

Lights

Select Dis

P01 D1 T??

P01 D1 T01

- Even if you program a disc or track which does not exit in the tray, it is deleted automatically in playback.
- Press the **BACK** key to return to the previous step and restart operation from there.
- Up to 32 tracks can be programmed. When "Full" is displayed, no more tracks can be programmed.

← Scrolled display  
(Press 'ENTER' to Start, 'JOG' to Check )

Press 'ENT'

## 4 Check the programmed tracks (and replace, add or delete tracks as required).

To check:

To replace a track in the program:

- ① Select the programmed disc or track to be replaced and press the SELECT key.
- ② Select a disc or track to replace the disc or track selected above (step ① and ②).

P01 D1 T02

- The programmed tracks are displayed in sequence.

P12 D3 T04

P12 D3 T04

- The blinking item can be replaced.

To add a track to the program:

- ① Select the display as shown on the right and press the SELECT key.
- ② Perform the same operations as in step ① and ②.

Display when 12 tracks have been programmed

P13 D? T??

- The added track number is added to the end of the existing program.

P12 D3 T04 → P12 clear

To quit the program mode

- ① Select "CD Program Play".

- ② Press the MENU key.

Goes off

- If the key is pressed during playback, normal playback in order of tracks resumes from the current track.

- The program mode can also be canceled by pressing the ▲ OPEN key.

## 5 Enter it.

(Playback starts from the first programmed track (program No. 1))

- Turn the MULTI CONTROL jog dial during program playback to stop to the previous or next programmed track.
- When the jog dial is rotated a little in the direction of counterclockwise once during playback, the track being played will be played from the beginning.
- To check (replace, add or delete) programmed tracks after playback, perform the operations in steps ② and ④.

# Repeated playback

Desired titles or discs can be played back repeatedly.

- When the **TIME** key of the remote control unit is pressed during playback, the time display appears but it soon returns to the original display.

**To cancel random playback**

Select "Random off".

(Remote control unit only)

RDS is a system which transmits useful information (digital data) for FM broadcasts together with the broadcast signal. Tuners and receivers designed for RDS reception can extract the information from the broadcast signal for use with various functions such as automatic display of the station name.

## This unit is equipped with the following functions utilizing RDS data:

### PTY (Program Type Identification) Search :-

The tuner automatically searches for a station which is currently broadcasting a specified program type (genre).

### PS (Program Service Name) Display : (See below.)

When an RDS broadcast is received, the station name is automatically displayed.

### EON (Enhanced Other Network) :

When the information to be received is set in advance and any RDS station in the same network starts broadcasting of such information, the reception automatically will be switched to that station.

The "RDS" indicator lights up when an RDS broadcast (signal) is received.

RDS    TP    PTY    EON    TA

NEWS

- Some functions may not be provided or be given different names depending on countries or areas.

## Note before the use of RDS

For reception of RDS stations, the auto presetting function must be used to preset the stations. With the auto presetting function, RDS stations are preset with priority.

Set the receiving band to FM and preset RDS stations with the auto preset function. 

## To switch the display contents

Pressing the RDS DISP. key changes the display contents.

(Remote control unit only)

### Display mode priority ranking

#### When an RDS broadcast is received :

##### ① PS (Program Service Name) Display :

When an RDS broadcast is received, the station name is automatically displayed.  
If no PS data was sent, "NO PS" is displayed.

AUTO ST.   
BBC

##### ② Frequency Display :

The frequency of the current station is displayed.

AUTO ST.   
01FM102.50 

# Searching for a desired program type (PTY search)

By specifying the type of program (genre) you want to listen to, the tuner automatically searches for a station which is currently broadcasting a program of the specified type.

**Set the reception band to FM. Preset RDS stations with the auto preset function.**

→ 31

## 1 Select the PTY search mode.

(Remote control unit only)

## 2 Select the desired program type.

Use program type table on the right for your convenience.

### A To select using the $\blacktriangleleft\blacktriangleright$ keys

XD-6...series  
XD-8...series

XD-7...series

Select while "PTY" indicator lights up.

The  $\blacktriangleleft\blacktriangleright$  keys can be used to select one of the 29 program types by displaying them in sequence.

Press and hold the key and release it when the desired program type appears.

### B To select using the numeric keys

(Remote control unit only)

XD-6...series  
XD-8...series

XD-7...series

The numeric keys can be used to specify the desired program type directly by selecting a number between 01 and 28.

**Example:**

To select 23: Press  $\text{+10}$   $\text{+10}$   $3$ .

When an RDS broadcast is received, the program type is shown on the display. If no PTY data is available, or if the station is not an RDS station, "NONE" is displayed.

### Program type table

Goes off

**To change to a different program type :**

Repeat steps 1, 2, 3.

# To be able to listen to the desired information at any time (EON)

By using the EON function, which manages the information of other stations, listening to desired information like traffic information or news etc. can be reserved even when it is not being transmitted at the present. When listening to a station with the "EON" display lit and another station of the same network starts to broadcast an information program for which a reservation has been made, then that station will be selected automatically. When the desired information program ends, return is made to the original program.

**Set the reception band to FM.**

→ 30

## 1 Auto preset the stations.

① Receive a broadcast.

② Keep the TUNING MODE key pressed (2 sec or longer).

(The EON data presently being broadcasted are taken in automatically.)

Step ① is not required when auto presetting has already been executed.

→ 31

- When all 30 stations have already been preset by the procedure for "One-by-one presetting (manual preset)", the EON function will not operate. Auto presetting must be used.

Each press switches the modes as follows.

- ① TA ..... Traffic Announcement
- ② NEWS ..... News
- ③ TA/NEWS ..... Traffic Announcement/News
- ④ Display not lit ..... EON cancelled

## 2 Select the desired information.

(Remote control unit only)

## 3 Receive an RDS station.

Select a station where "RDS" and "EON" are lit.

XD-6...series  
XD-8...series

XD-7...series

- Please execute automatic presetting when TA and NEWS can not be selected.

- When "EON" does not light although an RDS station is received, that station is not transmitting EON data. Please select a different station.
- If you want TA programs, select the stations with which the "TP" indicator lights.

## 4 Wait for the desired information.

**CD or tape playback may also be started.  
As long as the unit is ON, the unit is always  
ready for the reception.**

- When one of the stations of the network of the station received in 3 starts broadcasting the program contents selected in 2, that station will be received automatically. At this time, tape playback will stop and CD playback will pause. However, external equipment (MD/DVD) will remain as it is.
- The EON function does not operate during recording (including dubbing).
- When the transmission of the selected program contents ends in case of automatic reception with the EON function, return will be made to the status directly before operation of the EON function. When tape or CD playback has been interrupted, it will be continued from the point of interruption.

### ***Waiting for information while a RDS station without EON function is tuned***

If the EON indicator does not light with the RDS station in steps 3 and 4, the tuner will wait for only the desired information broadcast from the tuned RDS station provided that the desired information has been selected in the previous step.

### ***TP (Traffic Program) indicator***

The lighting of the TP indicator indicates that the currently tuned station or a station in the same network as it broadcasts traffic announcement programs. If the TP indicator already lights with the current station, you can listen to the traffic announcement program through the station without making reservation with the EON function.

## Selection of the recording type

With this unit, the following edit recording is possible according to the purpose.

Note that this cassette deck cannot record onto Metal tapes.

### If you want to select the track to be recorded while playing a CD

#### Recording only desired titles

→ 47

##### CD ONE TRACK RECORDING

Perform this operation when a track you want to record starts during CD playback. This starts recording of the track from the beginning.

### If you want to record a CD in order of track numbers

#### Recording of an entire CD

→ 48

##### CD DIRECT RECORDING

Perform the "CD DIRECT RECORDING" operation while the CD player is in stop mode to start recording.

### If you want to record only the desired tracks

#### Recording the programmed titles

→ 49

##### CD PROGRAM RECORDING

Program the desired tracks from up to 3 CD discs in the desired order and record the programmed playback onto tape.

With recording onto tape, the track will be interrupted for the part of the guide tape at the tape reversal, where recording is not possible. Please use single-side recording if this is to be avoided.

### In regard to CD-TEXT (Remote control unit only)

When a CD-TEXT disc is played on this unit, it displays the text information (disc or track title) recorded in the CD.

To switch the displayed text information between the disc title and track title during playback, press the TEXT DISP. key.

(When pressed during playback)

→ Scrolls the disc title display.

## Listening to music with desired tone and sound field

This unit permits selection of a variety of preset equalizer patterns as well as registration of equalizer patterns created by the user. The "S.direct" (Source direct) mode allows you to reproduce pure sound by bypassing the sound processing circuitry such as the EX.BASS (Extra Bass) and equalizer circuits.

### Selecting the equalizer pattern and 3D surround level (XD-7...series)

Select the desired pattern and 3D surround level according to the category of the played music. The equalizer and 3D surround effects can be recorded together with the music.

#### 1 Play the desired music.

#### 2 Select the desired equalizer pattern.

(Main unit)

(Remote control unit)

or

The following items can be selected by turning the SOUND CONTROL jog dial.

- "Rock" ..... Rock music
- “Pop” ..... Pop music
- “Jazz” ..... Jazz music
- “Classic” ..... Classical music
- “Disco” ..... Disco music
- “Movie” ..... Movie music
- “3D Level 1” ..... 3D surround level 1
- “3D Level 2” ..... 3D surround level 2
- “Custom EQ 1”
- “Custom EQ 2”
- “Custom EQ 3”
- “S. direct” ..... Pure sound reproduction by turning the equalizer or 3D surround circuitry off.
- “Effect off” ..... Normal playback

Equalizer's manual memory created by the user

- To cancel the equalizer, 3D surround and “S.direct”, select “Effect off”.

### Equalizer/3D surround/“S. direct” indicators

Lights when “S.direct” is selected.

Lights when 3D surround is selected.

Lights when equalizer is selected.

### 3D surround (XD-7...series)

This is a system producing a three-dimensional sound space. The feeling of depth, the width of the sound field, etc. are improved clearly, and the listening area also is widened.

### \* DSP (Digital Signal Processor) playback (XD-6...series, XD-8...series)

The DSP mode uses the digital processing capability of the DSP to create the reverberation components (factors of sound reflections in a variety of spaces), that determine the feeling of presence, without altering the quality of the music source.

The DSP mode creates the ambiance of a hall, disco, live house or church from any kind of program source. This mode is particularly effective when listening to a stereo program source such as a CD, TV and FM broadcasting. Although the DSP mode can create a simulated stereo surround effect from a monaural source, the proper effect may not be obtained depending on the played software.

## Selecting the equalizer pattern, DSP playback or surround playback (XD-6...series, XD-8...series)

This unit permits selection of an equalizer pattern, the DSP playback or the surround playback as desired. The equalizer effect applied to the audio can be recorded together with it. (If DSP playback or surround playback is selected, its effect cannot be recorded together with the audio.)

Check the surround speakers system connection and set up the surround play before starting DSP or surround playback. Please also read "Surround function".

## Surround function (XD-6...series, XD-8...series)

### Dolby Pro Logic Surround

When video (LD) software carrying  mark is played, this mode provides the Dolby Surround effect, similar to movie theaters.

Dolby Pro Logic is a specially encoded 2 channel surround format designed to provide theater-like surround sound from Dolby Surround encoded sources (such as video and Laserdisc software marked ).

This unit is equipped with a Dolby Surround decoder to let you enjoy the wide variety of currently available Dolby Surround home video software.

\* Optional in this mode.

### Dolby 3 Stereo Surround

This mode improves the positioning of the acoustic image of words, etc., by applying directivity enhancer processing and using an additional center speaker when a video software program recorded with ordinary 2-channel stereo is played.

Dolby 3 Stereo is available for systems that do not set surround speakers. When in the Dolby 3 Stereo mode the surround information is redirected to the front left and right speakers. This mode is designed for use with Dolby Surround program sources, but can also improve sound field unity for programs that are not Dolby Surround encoded. Dialog positioning and sound image definition, however, may not be as accurate when used with programs that are not Dolby Surround encoded.

\* Optional in this mode.

### Dolby Virtual Surround

The surround signals output in the Dolby Pro Logic and Dolby 3 Stereo modes have usually been set to offer rich feeling of presence when five speakers are used.

The Dolby Virtual Surround function offers a simulated surround effect using only the left and right front speakers.

\* Optional in this mode.

## Surround setting (XD-6..series, XD-8..series)

### 1 Select "Surround Setup".

The following items can be selected by turning the MULTI CONTROL jog dial.

- ("CD Program Play")
- ("Recording Options")
- ("Tape Dubbing")
- ("Audio Options")
- ("Clock Options")
- "Surround Setup"**

← Scrolled display (Surround Setup)

Surround S

- Be sure to adjust from your listening position.

### 2 Select the center speaker size (or select "No" if no center speaker is used at all).

The following items can be selected by turning the MULTI CONTROL jog dial.

- "Small" ..... When the center speaker is compact-sized speaker (Accessories)
- "Large" ..... When the center speaker is medium- or large-sized speaker
- "No" ..... When the center speaker is not used

← Scrolled display (Select Center Speaker)

Select Cen → Small

### 3 Select "Yes" if you use the surround speakers.

The following items can be selected by turning the MULTI CONTROL jog dial.

- "Yes" ..... When using surround speakers
- "No" ..... When not using surround speakers

## Speakers used and selected surround play modes

Center speaker	Surround speakers	Selectable surround modes
"Small" or "Large"	"Yes"	Any
"Small" or "Large"	"No"	"Dolby 3 stereo", "Dolby Virtual surround"
"No"	"Yes"	"Dolby Pro logic", "Dolby Virtual surround"
"No"	"No"	"Dolby Virtual surround"

Operating procedure
1 2 3 4 5 6
1 2 3 5 6
1 2 3 4 5 6
1 2 3 6

- The operations in steps 4 and/or 5 may sometimes be unnecessary when the center and/or surround speakers are set to "No" in the "Surround setting" procedure steps 2 and/or 3.

## 4 Select the delay time.

→ Scrolled display (Select delay time)

Select del → 20ms

The following items can be selected by turning the MULTI CONTROL jog dial.

- "20ms" ... When the listening position is located between the front and surround speakers
- "30ms" ... When the listening position is closer to the surround speakers
- "15ms" ... When the listening position is closer to the front speakers

## 5 Adjust the volume balance.

① Press the MULTI CONTROL key while "Test C" or "Test S" is displayed.

② Adjust the surround speaker volumes equal to the volume of the test tone from the left and right front speakers.

To decrease

Display for the center speaker volume adjustment :

C-ch +8

Display for the surround speaker volume adjustment :

S-ch +8

③ After completing the volumes from all the speakers, press the SELECT key.

→ Scrolled display (Select Channel Level)

Select Cha → Test L

The display and test tone output speaker are switched automatically.

When adjusting the center speaker and surround speaker volume levels :

- ① "Test L" (Left)
- ② "Test C" (Center)
- ③ "Test R" (Right)
- ④ "Test S" (Surround)

● When the center speaker and/or surround speakers are set to "No" in the "Surround setting" procedure steps ② and/or ③, the display and test tone output of the speakers are not provided.

- Be sure to adjust from your listening position.
- The volume level can be adjusted in steps of 1 dB.
- The volume levels can be adjusted in the range from -10 dB to +10 dB.
- The set center level value will be stored as the common setting for "Dolby Pro logic" and "Dolby 3 stereo".

- After completion of the settings, the set contents will be displayed by scrolling.  
(Center speaker setting → Surround speaker setting → Delay time setting → "Press 'ENTER' to Save")

## 6 Press the ENTER key.

To start surround play, select surround playback with the LISTEN MODE key or SOUND CONTROL jog dial.

→ 53

### Delay time

This refers to the difference in timing of the sound output from the surround speakers with respect to that output from the front speakers. The delay time setting consists of adjusting this difference in time.

This unit incorporates a clock function. Be sure to adjust the correct time before using the timer function. The time is displayed only while the power is off.

### 1 Select "Clock Options".

The following items can be selected by turning the MULTI CONTROL jog dial.

- ▶ ("CD Program Play")
- ("Recording Options")
- ("Tape Dubbing")
- "Audio Options"
- "Clock Options"**
- ▶ "Surround Setup" (Except for XD-7...series)

← Scrolled display (Clock Options)

Clock Opti

Lights

The following items can be selected by turning the MULTI CONTROL jog dial.

- ▶ "Sleep Timer"
- "Adjust Time"**
- "O.T.T."
- "Timer Play"
- ▶ "Auto Power Save"

Example: Adjustment to 8:45

(For U.K., Europe and Russia)

0↔1↔2...13↔14...↔0...

(Other countries)

12 am ↔ 1 am ↔ 2 am ...  
1 pm ↔ 2 pm ... ↔ 12 am ...

● The time display starts to blink.

● Press the **SELECT** key. The hour is entered and the minute display starts to blink.

(For U.K., Europe and Russia) (Other countries)

00↔01↔02...59↔00↔01...

● Press the **BACK** key to return to the previous step and restart operation from there.

● To adjust correct time, press the **ENTER** key at the same moment as a time announcement.

- When the key is pressed while the "TIMER" indicator is lit, the timer setup mode is displayed after the clock display.
- The clock display blinks after the power cord has been unplugged from the AC power outlet and plugged in again or after a power failure. In this case, set the time of the day again.

### 2 Select "Adjust Time".

### 3 Enter the figure of hour.

To decrease the figure      To increase the figure

### 4 Enter the figure of minute.

To decrease the figure      To increase the figure

### To display the time

(In standby mode)

(Displayed for approx. 5 sec.)

### Sleep timer

The power is turned OFF automatically after the specified period has elapsed.

### Operate easy To use Timer (O.T.T.)

Playback of the selected input source starts at the specified time, and the power is switched off after one hour. This timer operates only once directly after setting.

### Timer programming

**Timer playback** : Plays (or receives) the selected source in the set time range.

**AI timer playback** (When timer playback starts, the volume increases gradually.)

**Timer recording** : Records the selected source in the set time range.

### Auto Power Save

When the power is ON and neither recording nor playback is executed for 30 minutes or more, the power is switched off automatically by this function.

## Adjust the clock before setting the timer.

→ 58

# Sleep timer

Set the number of minutes after which the power is to be turned OFF.

### 1 Select "Clock Options".

The following items can be selected by turning the MULTI CONTROL jog dial.

- ▶ ("CD Program Play")
- ▶ ("Recording Options")
- ▶ ("Tape Dubbing")
- ▶ "Audio Options"
- ▶ "Clock Options"**
- ▶ "Surround Setup" (Except for XD-7...series)

← Scrolled display (Clock Options)

Lights

Clock Opti

### 2 Select "Sleep Timer".

The following items can be selected by turning the MULTI CONTROL jog dial.

- ▶ "Sleep Timer"
- ▶ "Adjust Time"
- ▶ "O.T.T."
- ▶ "Timer Play"
- ▶ "Auto Power Save"

Lights

### 3 Set the time

Blinks

Sleep 90

10↔20↔30...80↔90↔"Sleep off"↔10↔20...

- The displayed time changes in 10-minute steps. The maximum time that can be set is 90 minutes.
- The power is turned OFF automatically after the set time has elapsed.
- To cancel the sleep timer, turn the power off or select "Sleep off".
- The sleep timer does not operate until O.T.T. operation or program timer operation has ended.

## Operate easy To use Timer (O.T.T.)

Timer playback can be set with a simple operation of just setting the time. With this function, the last source selected before turning power off can be played by the timer. The power turned ON by the timer is switched off automatically in an hour after the timer playback starts.

**Adjust the clock before setting the timer.**

→ 58

**1 Select the desired source and adjust the volume.**

**2 Select "Clock Options".**

The following items can be selected by turning the MULTI CONTROL jog dial.

- ("CD Program Play")
- ("Recording Options")
- ("Tape Dubbing")
- "Audio Options"
- "Clock Options"**
- "Surround Setup" (Except for XD-7...series)

← Scrolled display (Clock Options)

**3 Select "O.T.T.".**

The following items can be selected by turning the MULTI CONTROL jog dial.

- "Sleep Timer"
- "Adjust Time"
- "O.T.T."**
- "Timer Play"
- "Auto Power Save"

**4 Select "O.T.T. on".**

The following items can be selected by turning the MULTI CONTROL jog dial.

- "O.T.T. off" (Canceled)
- "O.T.T. on"

- To cancel the O.T.T. timer, select "O.T.T. off".

← Scrolled display (Set on time)

7:20

7:20

(For U.K., Europe and Russia)

(Other countries)

- The ON time can be set in steps of 5 minutes.

- If the "TIMER" indicator is blinking now, set the time of the day again.

→ 58

**6 Put the unit in standby mode.**

Other program timers do not operate until "O.T.T." operation has ended.

# Timer programming

The program timer can set timer playback and timer recording and both of these functions can be reserved concurrently. Either "Everyday" (executing a timer program once every day) or "One Time" (executing it only once) can be selected for each timer program. Once the time range and content of a timer program has been set, it can be activated or deactivated as desired.

• If you made a mistake during timer setting:

Press the **BACK** key to return to the previous step and restart operation from there.

## Adjust the clock before setting the timer.

→ [58]

### 1 Make preparations for the play (recording).

#### To listen to radio

The stations to be received should already be preset in advance.

→ [31]

#### To listen to CD

Insert a disc. (Program playback is not possible.)

Select the disc to be played (1, 2 or 3).

→ [24] → [25]

#### To listen to tape

Set a tape in the deck you want to play back the tape.

→ [26]

#### Playing or recording the auxiliary input source

Make timer setting of the component connected to the MD/DVD INPUT jacks.

#### For recording

Make preparations for recording.

→ [32]

### 2 Adjust the listening volume.

### 3 Select the timer operation.

#### For timer playback or AI timer playback

##### ① Select "Clock Options".

- ("CD Program Play")
- ("Recording Options")
- ("Tape Dubbing")
- "Audio Options"
- "Clock Options"**
- "Surround Setup" (Except for XD-7...series)

##### ② Select "Timer Play".

- "Sleep Timer"
- "Adjust Time"
- "O.T.T."
- "Timer Play"**
- "Auto Power Save"

#### For timer recording

##### ① Select "Recording Options".

- ("CD Program Play")
- "Recording Options"**
- ("Tape Dubbing")
- "Audio Options"
- "Clock Options"
- "Surround Setup" (Except for XD-7...series)

##### ② Select "Timer Recording".

- "CD One Track Recording" (Only when the CD input is selected and during playback)
- "CD Direct Recording" (Only when the CD input is selected)
- "CD Program Recording"** (Only when the CD input is selected)
- "Timer Recording"

*Continued on next page...*

#### 4 Select "Everyday" or "One Time".

The reservation contents cannot be cleared. The contents are cleared only when they are changed.

#### 5 Enter the ON time.

The time is returned      The time is advanced

#### 6 Enter the OFF time.

The time is returned      The time is advanced

The following items can be selected by turning the MULTI CONTROL jog dial.

- "Timer off" (Canceled)
- "Everyday"
- "One Time"

- To cancel a timer operation, select "Timer off" under "Timer Play" (in case of timer playback) or "Timer Recording" (in case of timer recording).

← Scrolled display  
(Select on time)

Select on

(For U.K., Europe and Russia)

on 7:00

(Other countries)

on 7:00 am

- After entering the "hour", enter the "minute" with the same procedure.

← Scrolled display  
(Select off time)

Select off

(For U.K., Europe and Russia)

off 8:00

(Other countries)

off 8:00 am

- After entering the "hour", enter the "minute" with the same procedure.

- Reserve the timer recording program and timer playback program by leaving an interval of 1 minute or more so that their time ranges do not overlap.

### Auto Power Save

When the power is ON and neither recording nor playback is executed for 30 minutes or more, the power is switched off automatically by this function.

#### 1 Select "Clock Options".

- ("CD Program Play")
- ("Recording Options")
- ("Tape Dubbing")
- ("Audio Options")
- **"Clock Options"**
- **"Surround Setup"** (Except for XD-7...series)

#### 2 Select "Auto Power Save".

- "Sleep Timer"
- "Adjust Time"
- "O.T.T."
- "Timer Play"
- **"Auto Power Save"**

#### 3 Select "A.P.S. on" or "A.P.S. off".

- **"A.P.S. off"**
- Auto power save is not used.
- **"A.P.S. on"**
- Auto power save is used.

- The auto power save operation does not occur unless the O.T.T. or program timer operation has completed.
- When the TUNER or MD/DVD input is selected, this function operates only when the volume is set to zero.

## 7 Make the desired reservation.

### For timer playback or AI timer playback

#### ① Select the mode.

Select "Play" or "AI Play".

- ① "Play" ..... Timer play
- ② "AI Play" .. Timer play with gradually increasing volume

#### ② Select the input source.

Select the source to be played.

- ① TUNER ..... Radio
- ② CD
- ③ TAPE
- ④ MD/DVD .... External input

#### ③ Select the broadcast station (only when TUNER is selected above).

Select the preset station No.

## 8 Press the ENTER key.

### For timer recording

#### ① Select the input source.

Select the recorded input source.

- ① TUNER ..... Radio
- ② MD/DVD ... External input

#### ② Select the broadcast station (only when TUNER is selected above).

Select the preset station No.

- If timer recording of the "MD/DVD" input source is executed, it will take about 1 minute from the unit turning ON to the start of recording. As a result, this 1-second section will not be recorded even if the time is set precisely.
- When DSP or surround playback is selected, "Effect off" is set automatically at the same time as timer recording starts.

←Scrolled display (Press 'ENTER' to Save)

Press "ENT"

- The set program content items are displayed one after another.  
(**"Everyday"** or **"One Time"** → On time → Off time → Mode → Input source → Preset channel)

Lights

STANDBY

TIMER

- If the "TIMER" indicator is blinking now, set the time of the day again.

## 9 Put the unit in standby mode.

## Maintenance

### Cleaning the head section

### Cleaning the heads and peripheral components

For maintaining the best condition of the deck and for longer service life, always keep the heads (recording / playback / erase), capstan and pinch roller clean.

#### To clean them, perform the following:

1. Open the cassette holder.
2. Using a cotton swab dipped in alcohol, clean the head (recording / playback / erase), capstan and pinch roller carefully.

#### Demagnetizing the head

When the recording / playback head is magnetized, the sound quality will deteriorate. In such a case, demagnetize the head using a commercially available demagnetizer (head eraser).

There are precisely aligned parts around the heads, including the tape guides. When cleaning, pay special attention so as not to apply shock to them.

### Maintenance of the unit

When the front panel or case becomes dirty, wipe with a soft, dry cloth. Do not use thinner, benzine, alcohol, etc. for these agents may cause discoloration.

### In regard to contact cleaner

Do not use contact cleaners because it could cause a malfunction. Be specially careful not to use contact cleaners containing oil, for they may deform the plastic component.

## Reference

### Caution on condensation

Condensation (of dew) may occur inside the unit when there is a great difference in temperature between this unit and the outside.

This unit may not function properly if condensation occurs. In this case, leave the unit for a few hours with the power left ON, and restart the operation after the condensation has dried up.

#### Be specially cautious against condensation in a following circumstance:

When this unit is carried from a place to another across a large difference in temperature, when the humidity in the room where this unit is installed increases, etc.

### Memory backup function

### WARNING NOTICE:

IN MOST CASES IT IS AN INFRINGEMENT OF COPYRIGHT TO MAKE COPIES OF TAPES OR DISCS WITHOUT THE PERMISSION OF THE COPYRIGHT OWNERS. ANYONE WISHING TO COPY COMMERCIALY AVAILABLE TAPES OR DISC SHOULD CONTACT THE MECHANICAL COPYRIGHT PROTECTION SOCIETY LIMITED OR THE PERFORMING RIGHTS SOCIETY LIMITED.

What seems to be a malfunction is not always so. Before calling for service, check the following table according to the symptom of your trouble.

## Operation to reset

The microcomputer may fall into malfunction (impossibility to operate, erroneous display, etc.) when the power cord is unplugged while power is ON or due to an external factor. In this case, execute the following procedure to reset the microcomputer and return it to normal condition.

Unplug the power cord from the power outlet then, while holding the ENTER key depressed, plug the power cord again.

(Main unit only)

- Please note that resetting the microcomputer clears the contents stored in and returns and to condition when it left the factory.

## Cassette deck

Symptom	Cause	Remedy
<b>Sound cannot be produced by pressing the play key.</b>	<ul style="list-style-type: none"> <li>The head is dirty.</li> <li>The tape is wound too tight due to irregular winding.</li> <li>A nonrecorded tape is played.</li> </ul>	<ul style="list-style-type: none"> <li>Clean the head referring to <b>"Maintenance"</b>. → <b>64</b></li> <li>Try another tape.</li> <li>Play a recorded tape.</li> </ul>
<b>No operation occurs even when an operation key is pressed.</b>	<ul style="list-style-type: none"> <li>The cassette holder is not closed completely.</li> <li>The operation key is pressed immediately after closing the cassette holder.</li> <li>The operation key is pressed in less than 4 seconds after turning the power ON.</li> <li>A tape is not inserted in the unit.</li> <li>The tape is wound too tight due to irregular winding.</li> <li>The tape is fully wound to one of the reels.</li> </ul>	<ul style="list-style-type: none"> <li>Close the holder completely. → <b>26</b></li> <li>Press operations keys in more than a few seconds after closing the holder.</li> <li>Press operation keys after waiting for more than 4 seconds.</li> <li>Insert a tape. → <b>26</b></li> <li>Try another tape.</li> <li>Change the tape transport direction or reverse the tape insertion orientation. → <b>26</b></li> </ul>
<b>The DPSS malfunctions. (XD-7...series, XD-8...series only)</b>	<ul style="list-style-type: none"> <li>The tape used is not suitable for DPSS, for example the spaces between tunes may be too short.</li> </ul>	<ul style="list-style-type: none"> <li>Refer to <b>"Searching for the desired music program (DPSS)"</b>. → <b>29</b></li> </ul>
<b>In dubbing, the tape stops at different moments in decks A and B.</b>	<ul style="list-style-type: none"> <li>This is due to the difference in the tape length or characteristics of the mechanisms of two cassette decks.</li> </ul>	<ul style="list-style-type: none"> <li>Small time difference does not mean a malfunction.</li> </ul>
<b>The cassette holders cannot be opened by pressing the ▲ PUSH OPEN area.</b>	<ul style="list-style-type: none"> <li>The key is pressed during recording or playback.</li> <li>The microcomputer is malfunctioning due to external noise.</li> </ul>	<ul style="list-style-type: none"> <li>Press in stop mode.</li> <li>Reset the microcomputer. → <b>65</b></li> </ul>
<b>Sound is harsh or high frequencies are not reproduced.</b>	<ul style="list-style-type: none"> <li>The head is dirty.</li> <li>The tape is stretched or shrunk.</li> </ul>	<ul style="list-style-type: none"> <li>Clean the head referring to <b>"Maintenance"</b>. → <b>64</b></li> <li>Try another tape.</li> </ul>

- With some tapes, a squeaky noise is produced when the tape is stopped automatically. This is due to the tape protection function, and not a malfunction.
- Do not use longer tape than 110 minutes tapes, for the tape is too thin and gets easily tangled.

<b>Sound is distorted.</b>	<ul style="list-style-type: none"> <li>The tape being played was recorded with distorted sound.</li> <li>A tape which has been recorded with the equalizer and/or 3D surround effects is being played back by applying the equalizer effect.</li> </ul>	<ul style="list-style-type: none"> <li>Try another tape.</li> <li>Switch off the equalizer and 3D surround effects before starting playback. → <b>52</b> → <b>53</b></li> </ul>
<b>Sound from the MD/DVD INPUT (external input) is distorted.</b>	<ul style="list-style-type: none"> <li>The input level is too high.</li> </ul>	<ul style="list-style-type: none"> <li>Decrease the input level. → <b>51</b></li> </ul>
<b>Noise is noticeable.</b>	<ul style="list-style-type: none"> <li>The tape head is magnetized.</li> <li>External noise is induced.</li> <li>A tape which has been recorded with Dolby NR is being played back without switching the Tape Equalizer or Dolby NR on.</li> </ul>	<ul style="list-style-type: none"> <li>Demagnetize the head referring to → <b>64</b> <b>Maintenance</b>.</li> <li>Install the system at a distance from other electric appliances and TV.</li> <li>Switch on the Tape Equalizer or Dolby NR. → <b>27</b> → <b>33</b></li> </ul>
<b>Sound vibrates.</b>	<ul style="list-style-type: none"> <li>The capstans or pinch rollers are dirty.</li> <li>The tape is wound irregularly.</li> </ul>	<ul style="list-style-type: none"> <li>Clean the head referring to <b>Mainte-</b> → <b>64</b> <b>nance</b>.</li> <li>Wind the tape again by fast forward- → <b>27</b> ing, rewinding or playing from an end to the other.</li> </ul>
<b>Recording cannot be started by pressing the record key.</b>	<ul style="list-style-type: none"> <li>The recording protect tab of the cassette has been broken.</li> <li>The cassette holder is not closed completely.</li> <li>The <b>TAPE</b> input is selected.</li> <li>The tape is fully wound to one of the reels.</li> </ul>	<ul style="list-style-type: none"> <li>Use a cassette with an unbroken recording protect tab or block the hole.</li> <li>Close the holder completely. → <b>26</b></li> <li>Select the source to be recorded with the input selector key.</li> <li>Change the tape transport direction of deck B or reverse the tape insertion orientation.</li> <li>Select other equalizer pattern than the DSP play and surround play patterns. → <b>53</b></li> </ul>
<b>(XD-6...series, XD-8...series only)</b>	<ul style="list-style-type: none"> <li>The DSP play or surround play pattern is selected.</li> </ul>	

## CD player

Symptom	Cause	Remedy
<b>A CD is placed in the player but it cannot be played.</b>	<ul style="list-style-type: none"> <li>The disc is placed upside down.</li> <li>The disc position is displaced.</li> <li>The disc is extremely dirty.</li> <li>The disc is scratched.</li> <li>Dew is condensed on the optics lens.</li> </ul>	<ul style="list-style-type: none"> <li>Place the disc properly, with the label side facing upward.</li> <li>Place the disc properly. → <b>24</b></li> <li>Clean the disc referring to <b>Handling of discs and tapes</b>. → <b>21</b></li> <li>Try another disc.</li> <li>Refer to <b>Caution on condensation</b> → <b>64</b> and remove the condensation by evaporation.</li> </ul>
<b>Sound is not produced.</b>	<ul style="list-style-type: none"> <li>The disc has not been placed.</li> <li>The player is not put to the play mode.</li> <li>The disc is extremely dirty.</li> <li>The disc is scratched.</li> </ul>	<ul style="list-style-type: none"> <li>Place a disc in the CD player. → <b>24</b></li> <li>Press the play key. → <b>24</b></li> <li>Clean the disc referring to <b>Handling of discs and tapes</b>. → <b>21</b></li> <li>Try another disc.</li> </ul>
<b>Sound skips.</b>	<ul style="list-style-type: none"> <li>The disc is dirty.</li> <li>The disc is scratched.</li> <li>The player is subject to vibration.</li> </ul>	<ul style="list-style-type: none"> <li>Clean the disc referring to <b>Handling of discs and tapes</b>.</li> <li>Try another disc.</li> <li>Install the unit in a place not subject to vibrations.</li> </ul>

## Remote control unit

Symptom	Cause	Remedy
<b>Remote control operation is not possible.</b>	<ul style="list-style-type: none"> <li>Batteries are exhausted.</li> <li>The remote control is too far away from the system, the controlling angle is deviated or there is an obstacle in between.</li> <li>There is no tape or CD set in the component to be played.</li> <li>An attempt is made to play the cassette deck which is recording something.</li> <li>The MULTI CONTROL setting mode is activated.</li> </ul>	<ul style="list-style-type: none"> <li>Replace with new batteries. →  20</li> <li>Operate the unit inside the remote controllable range. →  20</li> <li>Set a tape or CD in the component to be played.</li> <li>Wait until the recording ends.</li> <li>Cancel the MULTI CONTROL setting mode. →  18 →  19</li> </ul>

## General

Symptom	Cause	Remedy
<b>No operation occurs when an operation key is pressed.</b>	<ul style="list-style-type: none"> <li>The MULTI CONTROL setting mode is activated.</li> </ul>	<ul style="list-style-type: none"> <li>Cancel the MULTI CONTROL setting mode. →  18 →  19</li> </ul>

## Main unit

### [ Amplifier section ]

Rated output power during STEREO operation	
FRONT (1 kHz, 1.0 % T.H.D., 6 Ω )	
Two channel driven	80 W + 80 W
Effective output power during STEREO operation	
FRONT (1 kHz, 10 % T.H.D., 6 Ω )	
One channel driven	100 W + 100 W
Effective output power during SUPER WOOFER operation	
FRONT (1 kHz, 10 % T.H.D., 6 Ω )	
One channel driven	100 W + 100 W
SUPER WOOFER (60 Hz, 10 % T.H.D., 6 Ω )	
One channel driven	100 W + 100 W
Signal to noise ratio	
MD/DVD INPUT	90 dB (IHF' 66)
Input sensitivity / impedance	
MD/DVD INPUT	380 mV / 47 kΩ
Output level / impedance	
MD REC OUTPUT (CD, 0 dB)	1.0 V / 10 kΩ

### [ Tuner section ]

#### FM tuner section

Tuning frequency range	87.5 MHz ~ 108 MHz
(For Russia)	65.0 MHz ~ 74.0 MHz

#### AM (MW) Tuner section

Tuning frequency range	
(For U.K., Europe and Russia)	531 kHz ~ 1,602 kHz
(Other countories)	
9 kHz step	531 kHz ~ 1,602 kHz
10 kHz step	530 kHz ~ 1,610 kHz

#### LW Tuner section (For U.K. and Russia)

Tuning frequency range	153 kHz ~ 279 kHz
------------------------	-------------------

#### SW Tuner section (XD-772S only)

Tuning frequency range	5.9 MHz ~ 17.9 MHz
------------------------	--------------------

### [ Cassette deck section ]

Track	4-track, 2-channel stereo
Recording system	AC bias system (Frequency: 105 kHz)
Heads	
A deck : Playback head	1
B deck : Playback/ recording head	1
Erasing head	1
Fast winding time	Approx. 115 seconds (C-60 tape)

### [ CD player section ]

Laser	Semiconductor laser
Wow & Flutter	Less than unmeasurable Limit
Digital output (Optical)	– 15 dBm ~ – 21 dBm (Wave length 660 nm)

### [ General ]

Power consumption	160 W
Dimensions	W : 280 mm H : 330 mm D : 386 mm
Weight (net)	11.0 kg

## Speakers (LS-N752/LS-N702)

Enclosure	Acoustic air suspension type (magnetically shielded)
Speaker configuration	
Super-woofer	160 mm, cone type
Woofer	160 mm, cone type
Tweeter	50 mm, cone type
Super-tweeter	25 mm, dome type
Impedance	6 Ω
Peak input level	135 W
Maximum input level	120 W
Dimensions	W : 324 mm H : 330 mm D : 390 mm
Weight (net)	8.4 kg (1 piece)

- 2.Sufficient performance may not be possible at very low temperatures (0°C or less).

**Main unit****[ Amplifier section ]**

(XD-6...series)

**Rated output power during STEREO operation**

FRONT (1 kHz, 1.0 % T.H.D., 6 Ω )

Two channels driven ..... 55 W + 55 W

**Effective output power during STEREO operation**

FRONT (1 kHz, 10 % T.H.D., 6 Ω )

One channel driven ..... 70 W + 70 W

**Effective output power during SURROUND operation**

FRONT (1 kHz, 10 % T.H.D., 6 Ω )

One channel driven ..... 50 W + 50 W

CENTER (1 kHz, 10 % T.H.D., 6 Ω ) ..... 20 W

SURROUND (1 kHz, 10 % T.H.D., 12 Ω )

One channel driven ..... 10 W + 10 W

**Signal to noise ratio**

MD/DVD INPUT ..... 90 dB (IHF' 66)

**Input sensitivity / impedance**

MD/DVD INPUT ..... 380 mV / 47 kΩ

**Output level / impedance**

SUPER WOOFER PREOUT ..... 1.6 V / 620 Ω

MD REC OUTPUT (CD, 0 dB) ..... 1.0 V / 10 kΩ

(XD-8...series)

**Rated output power during STEREO operation**

FRONT (1 kHz, 1.0 % T.H.D., 6 Ω )

Two channels driven ..... 80 W + 80 W

**Effective output power during STEREO operation**

FRONT (1 kHz, 10 % T.H.D., 6 Ω )

One channel driven ..... 100 W + 100 W

**Effective output power during SURROUND operation**

FRONT (1 kHz, 10 % T.H.D., 6 Ω )

One channel driven ..... 70 W + 70 W

CENTER (1 kHz, 10 % T.H.D., 6 Ω ) ..... 30 W

SURROUND (1 kHz, 10 % T.H.D., 12 Ω )

One channel driven ..... 15 W + 15 W

**Signal to noise ratio**

MD/DVD INPUT ..... 90 dB (IHF' 66)

**Input sensitivity / impedance**

MD/DVD INPUT ..... 380 mV / 47 kΩ

**Output level / impedance**

## Front speakers (LS-N472) (XD-6..series)

Enclosure .....	Bass-reflex type (magnetically shielded)
<b>Speaker configuration</b>	
Woofer .....	160 mm, cone type
Tweeter .....	50 mm, cone type
Impedance .....	6 Ω
Maximum input level .....	70 W
Dimensions .....	W : 220 mm H : 330 mm D : 284 mm
Weight (net) .....	4.0 kg (1 piece)

## Front speakers (LS-N572) (XD-8..series)

Enclosure .....	Bass-reflex type (magnetically shielded)
<b>Speaker configuration</b>	
Woofer .....	160 mm, cone type
Tweeter .....	50 mm, cone type
Super-tweeter .....	25 mm, dome type
Impedance .....	6 Ω
Maximum input level .....	120 W
Dimensions .....	W : 220 mm H : 330 mm D : 297 mm
Weight (net) .....	4.2 kg (1 piece)

## Surround speaker system (CRS-N572)

### [ Surround speaker ]

Enclosure .....	Bass-reflex type
Speaker configuration .....	100 mm, cone type
Impedance .....	12 Ω
Maximum input level .....	15 W
Dimensions .....	W : 199 mm H : 96 mm D : 212 mm
Weight (net) .....	1.0 kg (1 piece)

### [ Center speaker ]

Enclosure ...	Bass-reflex type (magnetically shielded)
Speaker configuration .....	100 mm, cone type
Impedance .....	6 Ω
Maximum input level .....	30 W
Dimensions .....	W : 260 mm H : 124 mm D : 193 mm
Weight (net) .....	1.3 kg (1 piece)
